

Website Accessibility Policy

- 1) All new or revised Web pages and other Web resources published, hosted or otherwise provided by RCB must be in compliance with the World Wide Web standards defined in the Federal Rehabilitation Act Section 508, specifically subsections 1194.22 and subsection 1194.31.
- 2) Reasonable effort must be taken to ensure that legacy Web pages and resources are in compliance with these subsections of Federal Rehabilitation Act Section. That effort must be documented.
- 3) Upon specific request, information on legacy Web pages and resources is to be made available to any individual needing access to such content.
- 4) What constitutes a Web page or other Web resource is to be interpreted broadly, and for example, does not depend upon the type of client or host device, the type of software on the client or host devices, or the technical means by which the client and host communicate over the Web.
- 5) Web pages or resources specifically requested to be made accessible as part of a formal accommodation request shall be made accessible as soon as possible, or an equally effective alternative shall be provided. Equally effective means that it communicates the same information and provides the equivalent functions in as timely a fashion as does the Web page or resource.
- 6) Each Web site must contain an accessible link or a person to contact if users have trouble accessing content within the site. This would usually be the Marketing Department. The addition of a link or contact person is not sufficient, in and of itself, to comply with the World Wide Web Accessibility Policy.
